Liquid/liquid cell for neutrons

**Investigate liquid/liquid interfaces
with horizontal reflectometers**

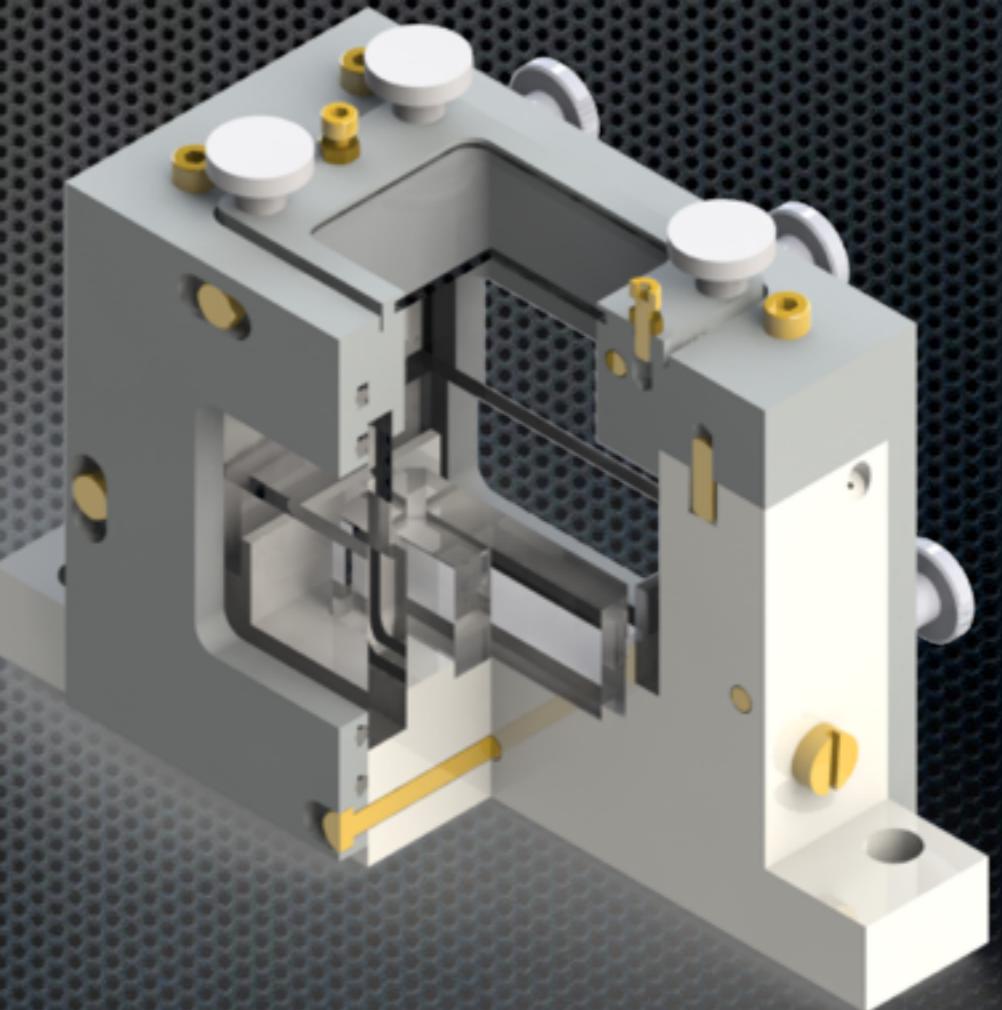

- 40 mm optimized neutron path
- Incident beam coming from below or above the interface through quartz
- Flattened meniscus
- Reduced sample volume
- Syringe ports for filling the cell
- Permanent visual access

- Permanent visual access

Cell in use on Figaro (ILL)

Liquid/liquid cell for X-rays

**Investigate liquid/liquid interfaces
with horizontal reflectometers**

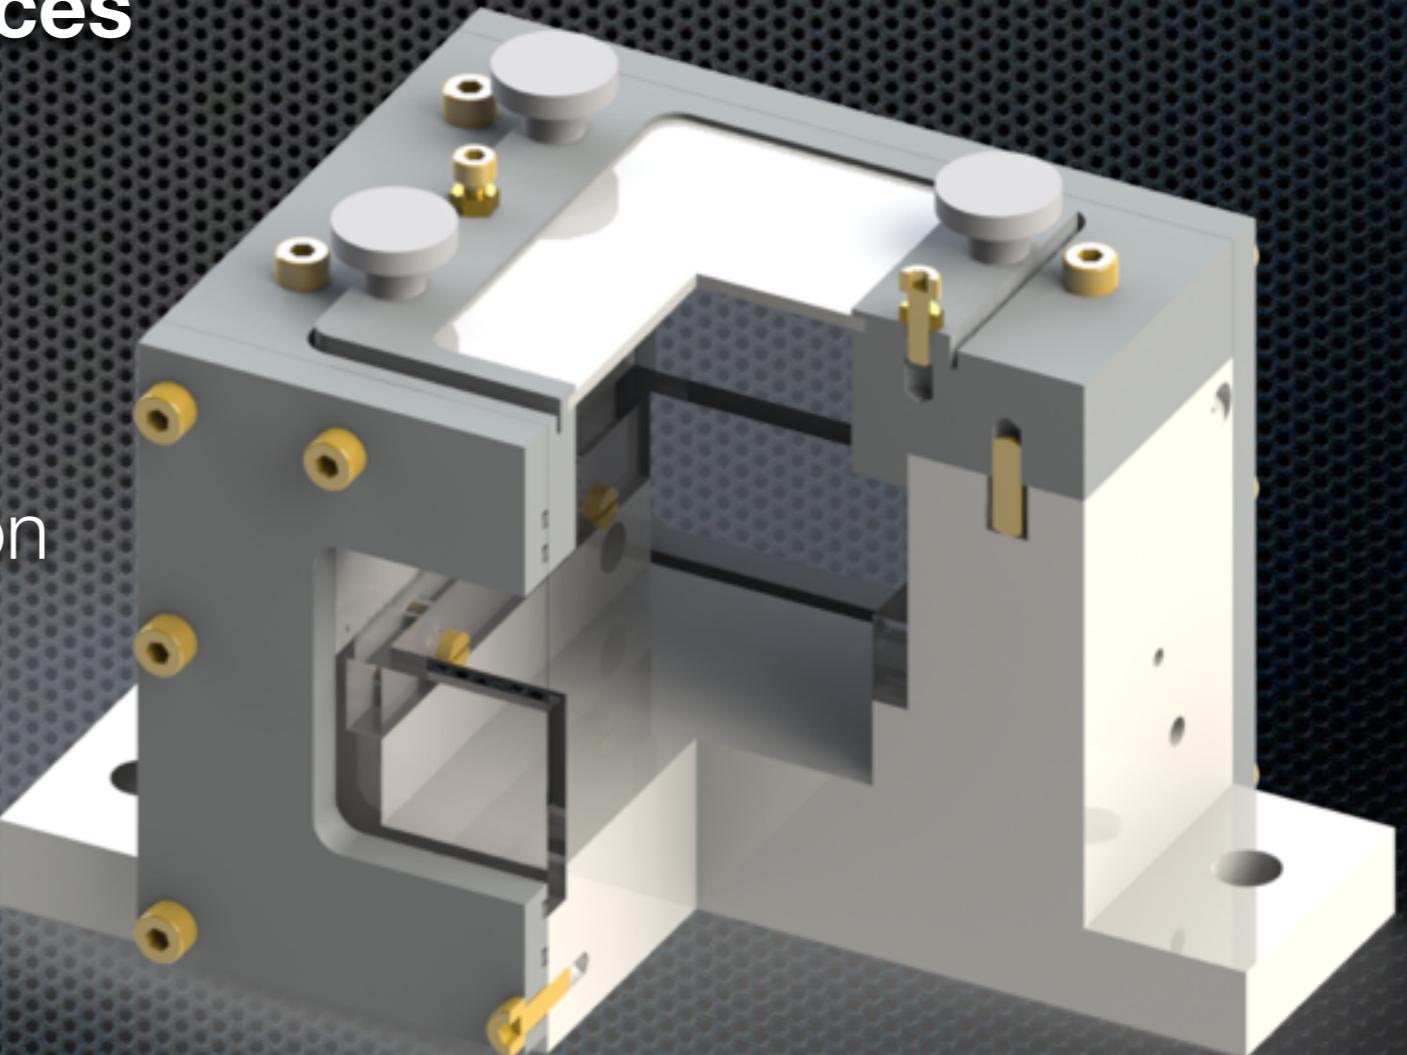

- 70 mm optimized X-ray path
- Incident beam coming only from above the interface through kapton
- Flattened meniscus
- Reduced sample volume
- Syringe ports for filling the cell
- Permanent visual access

Liquid/liquid cells...

Forget
machinists!

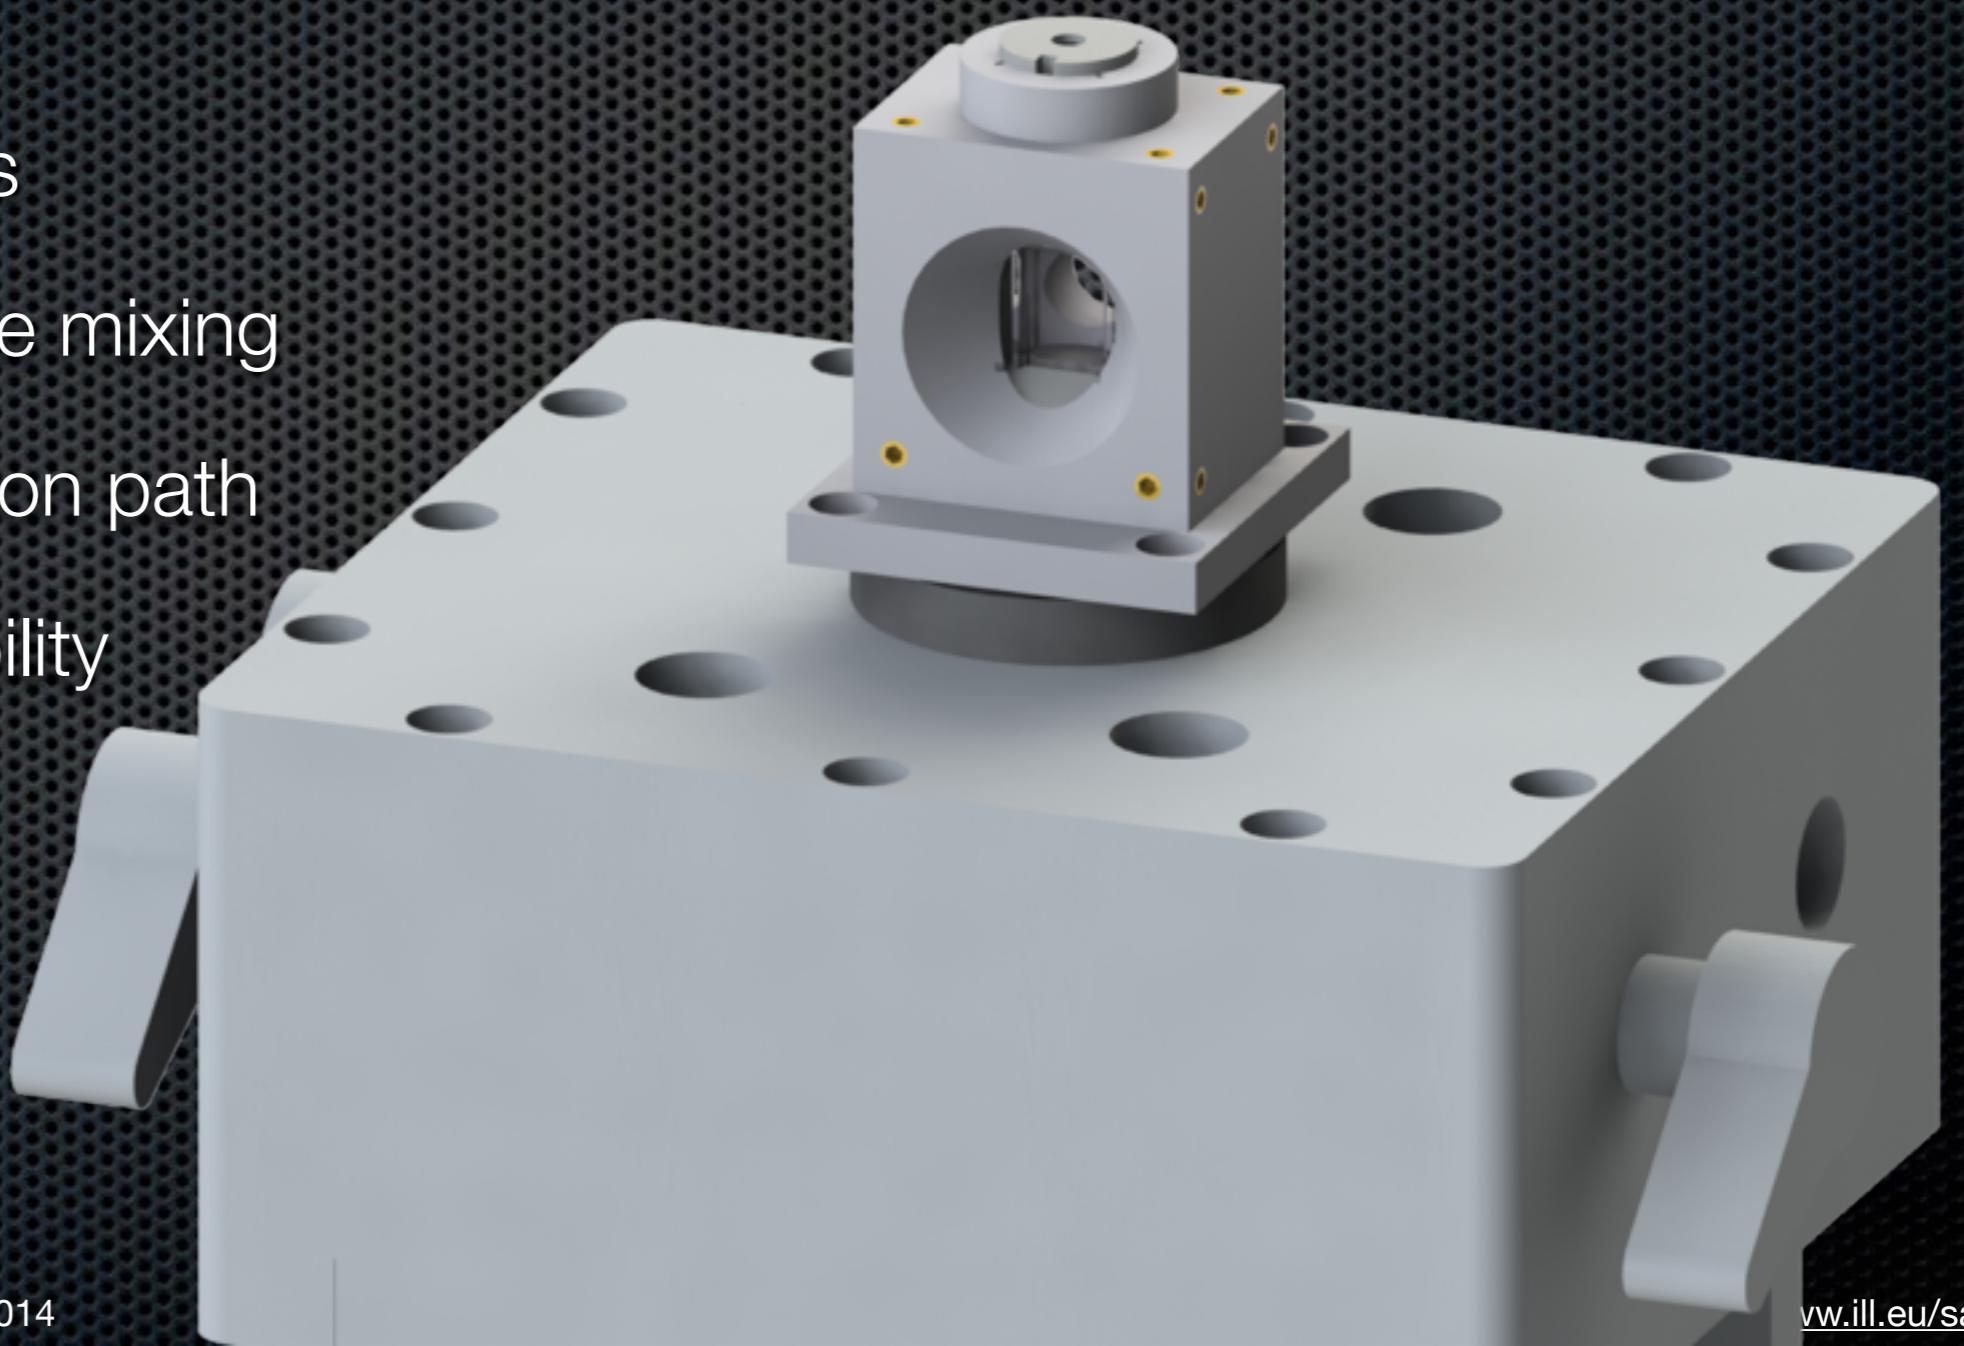

Work with
glass blowers!

New observation head for stopped-flow chambers

Needs

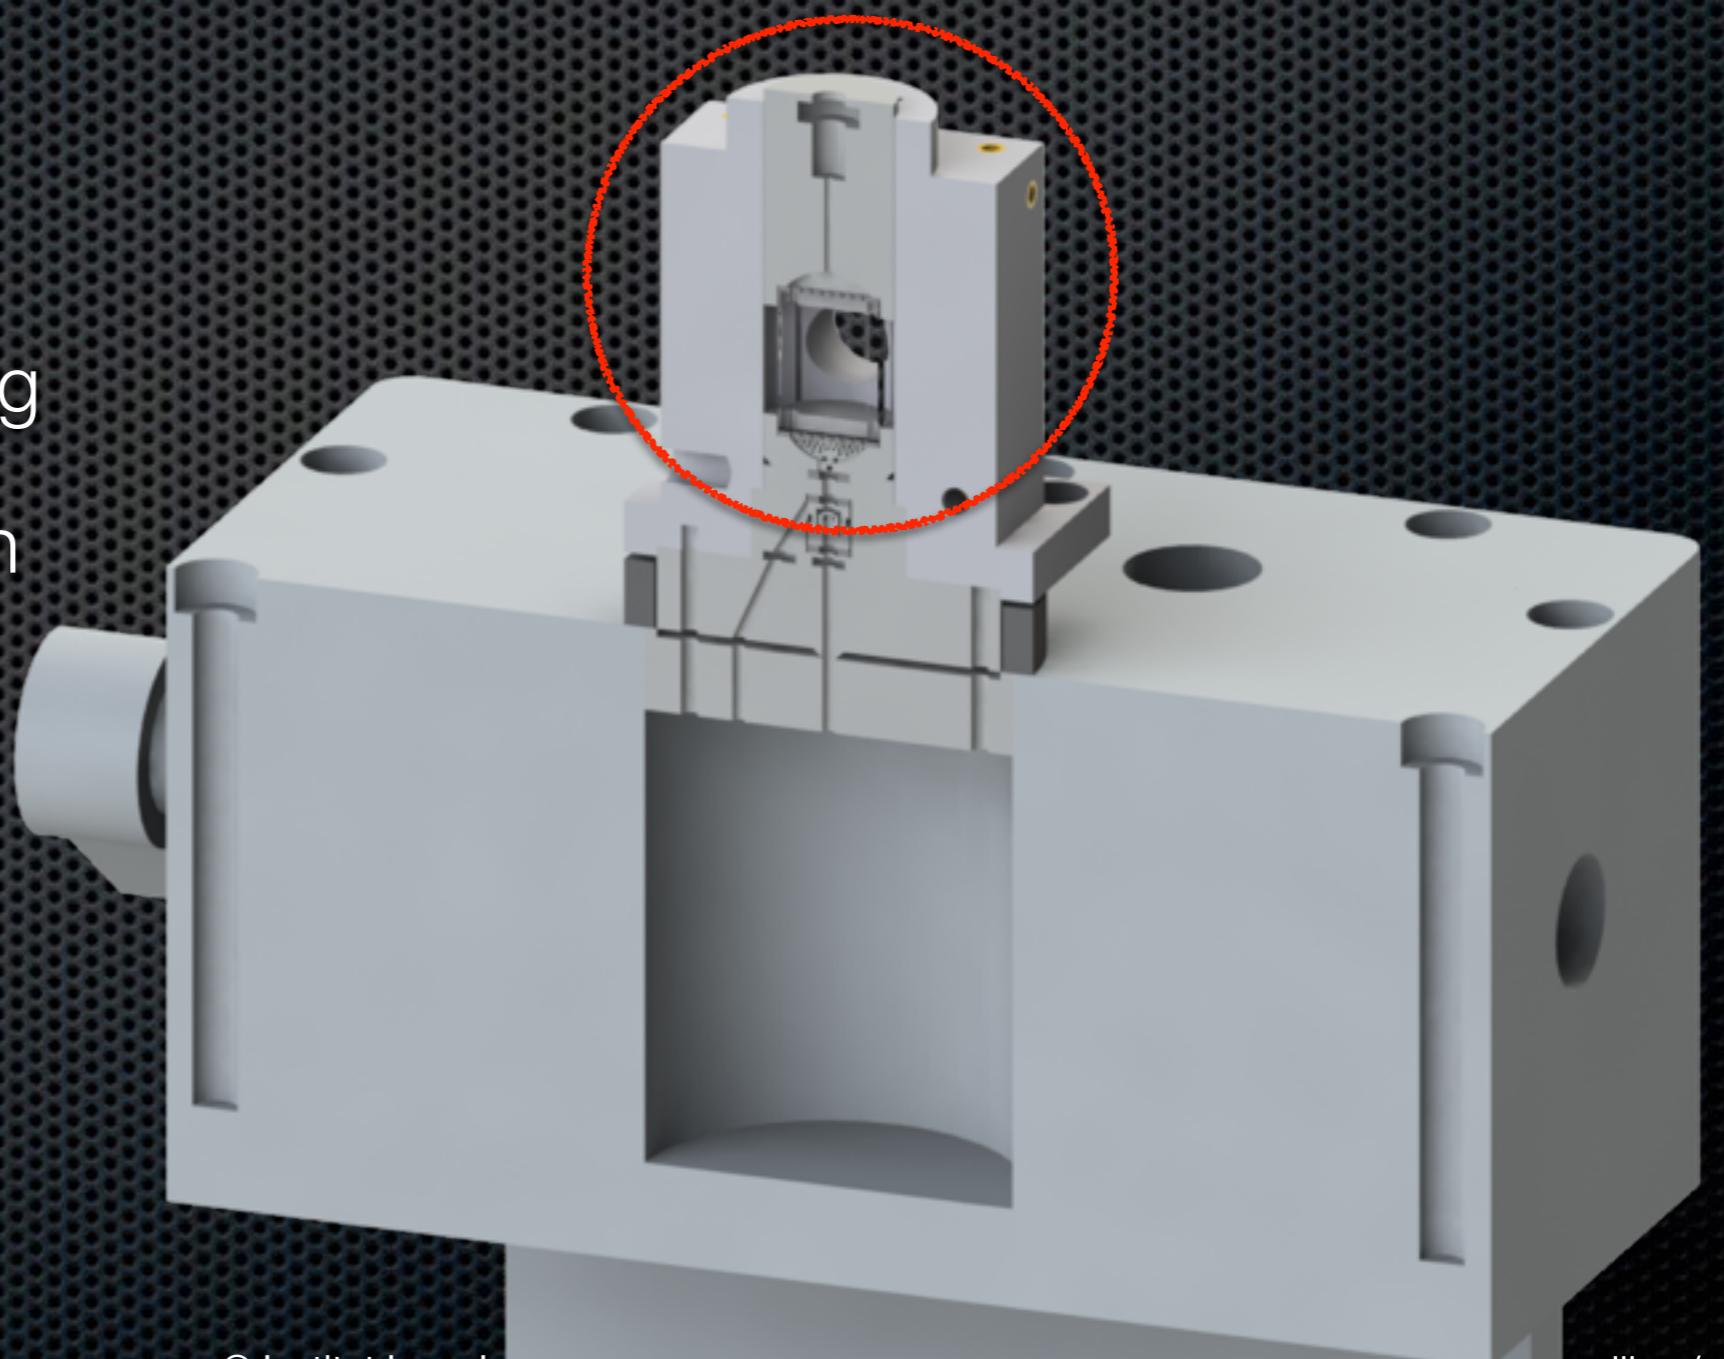

- Reduced wastes
- Improved sample mixing
- Selectable neutron path
- Improved T stability

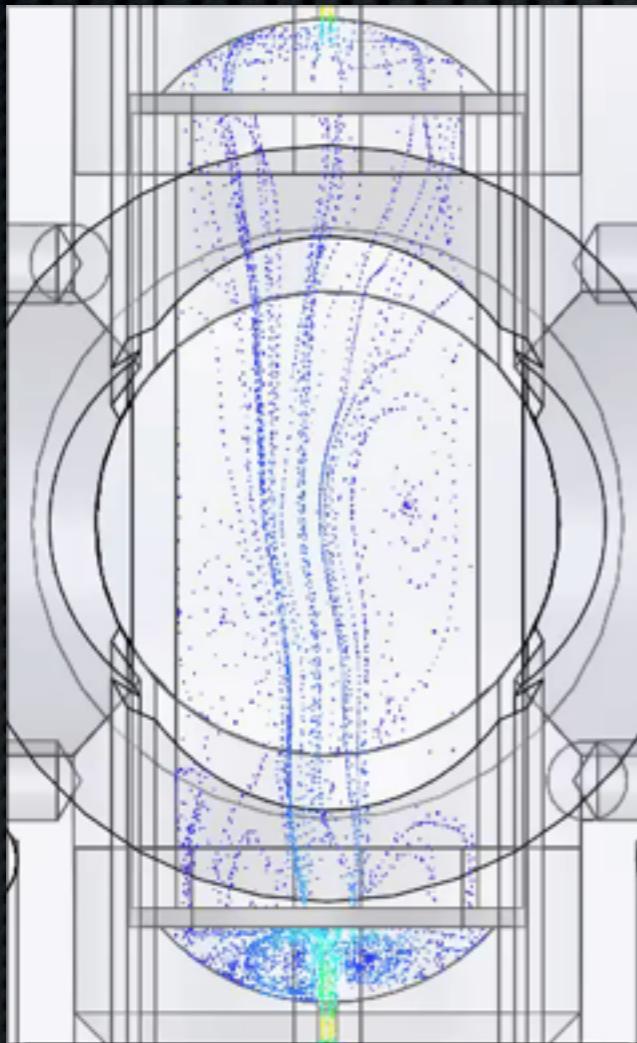

New observation head for stopped-flow chambers

Needs

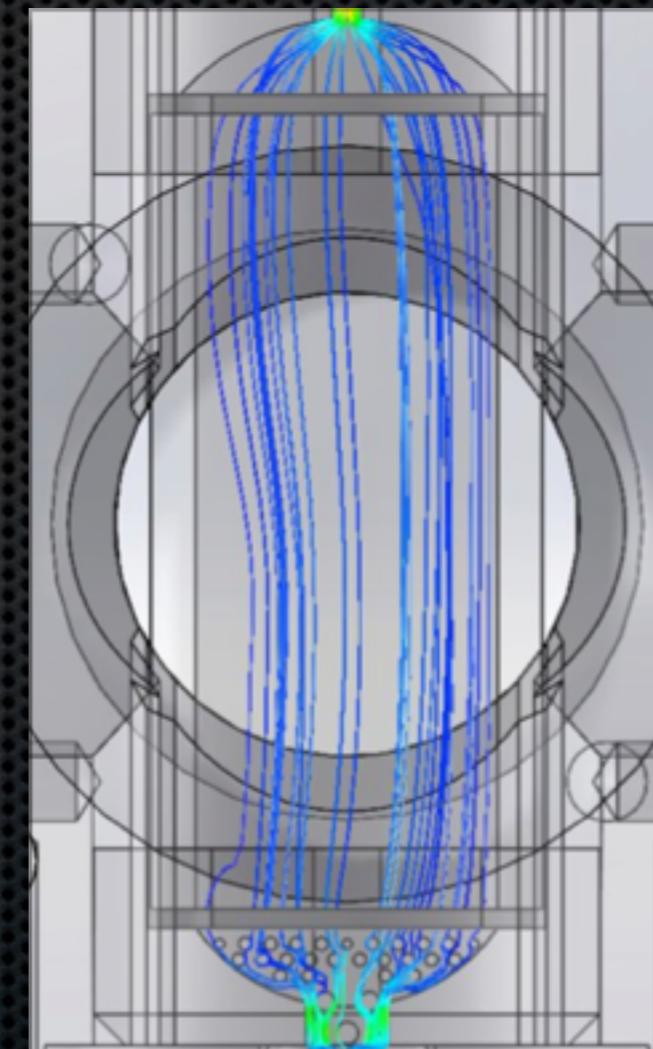

- Reduced wastes
- Improved sample mixing
- Selectable neutron path
- Improved T stability

New observation head for stopped-flow chambers

Without damping grid

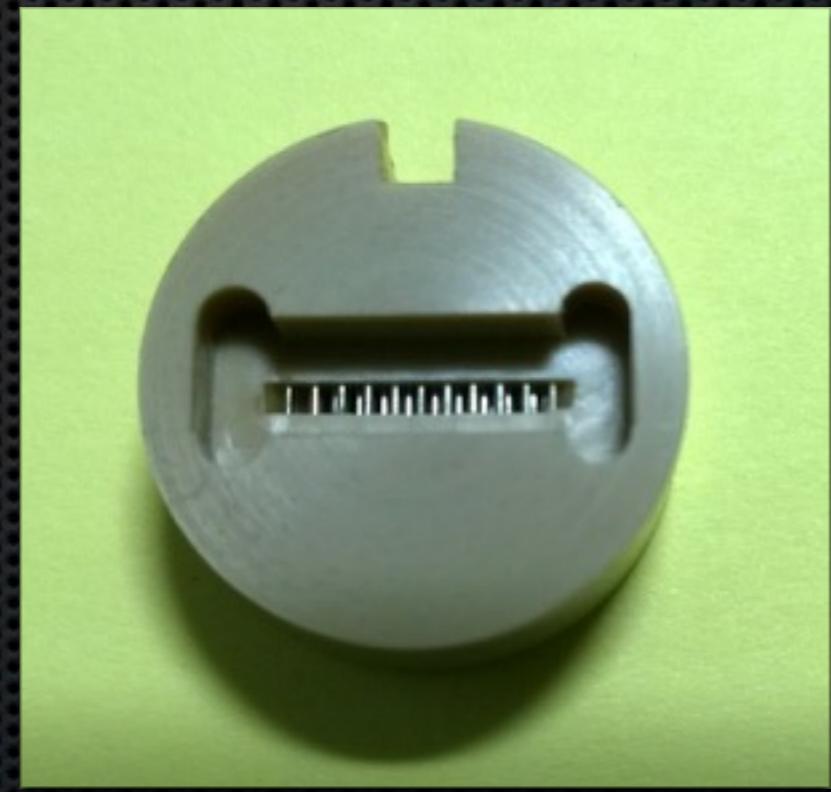

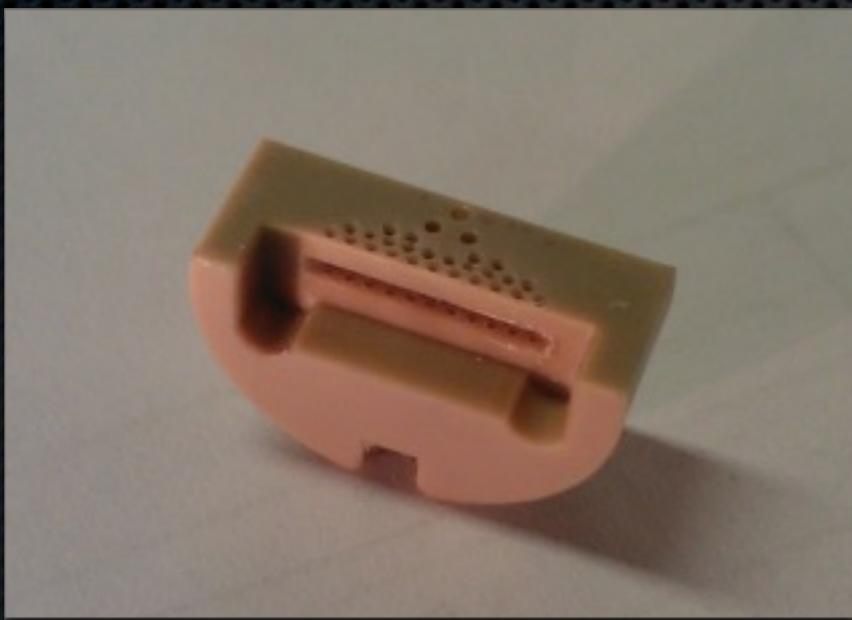

With damping grid

New observation head for stopped-flow chambers

...> & v - , .

Old design

New observation head for stopped-flow chambers

We love working with Andy, Colin, Oleg *et al.* (ISIS)
Thanks for their great help !

New observation head for stopped-flow chambers

New design

New observation head for stopped-flow chambers

Fluid circuit plugged
to schiller for T control

Beam

Perspectives:

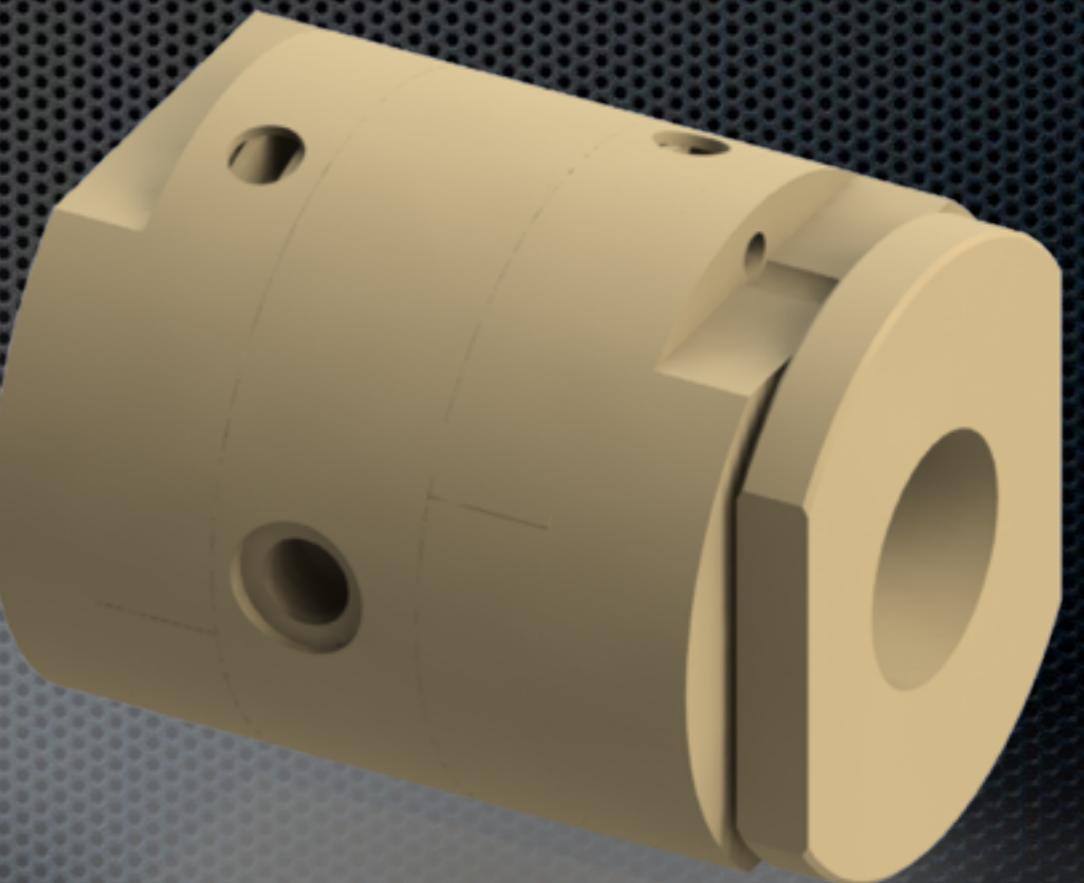

- add insulating envelope
- use different neutron paths

63°

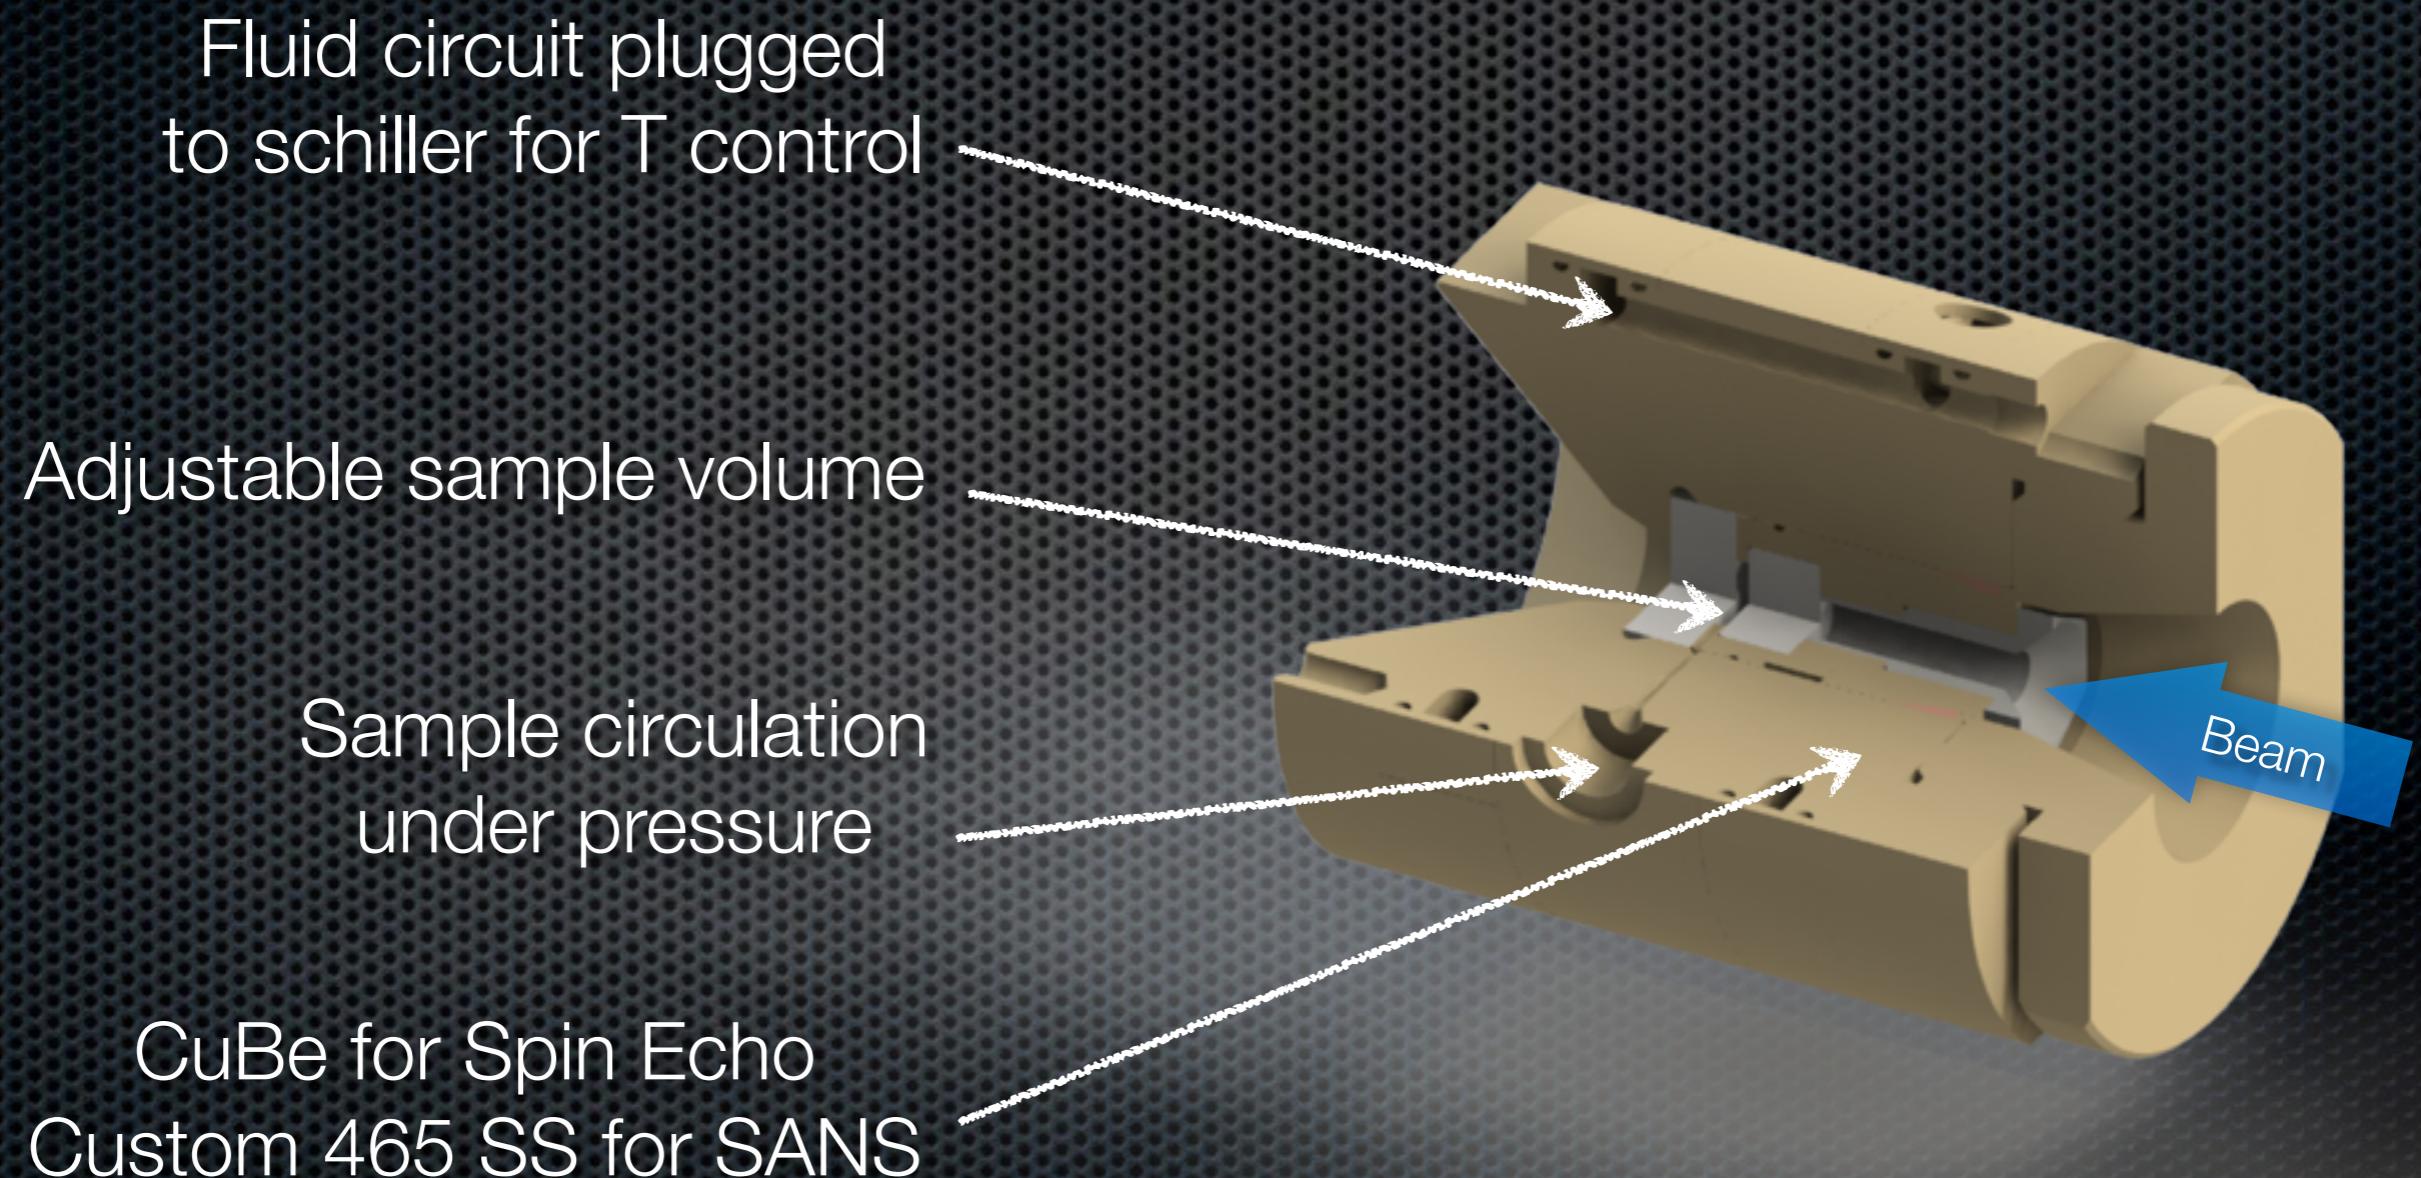

5 kbar cells for NSE & SANS

Needs

- Non-magnetic for Spin Echo
- Bio-compatible
- 45° access to scattered beam
- No diffuse scattering
- Easy to manipulate and clean
- T controlled (0 - 100 °C)

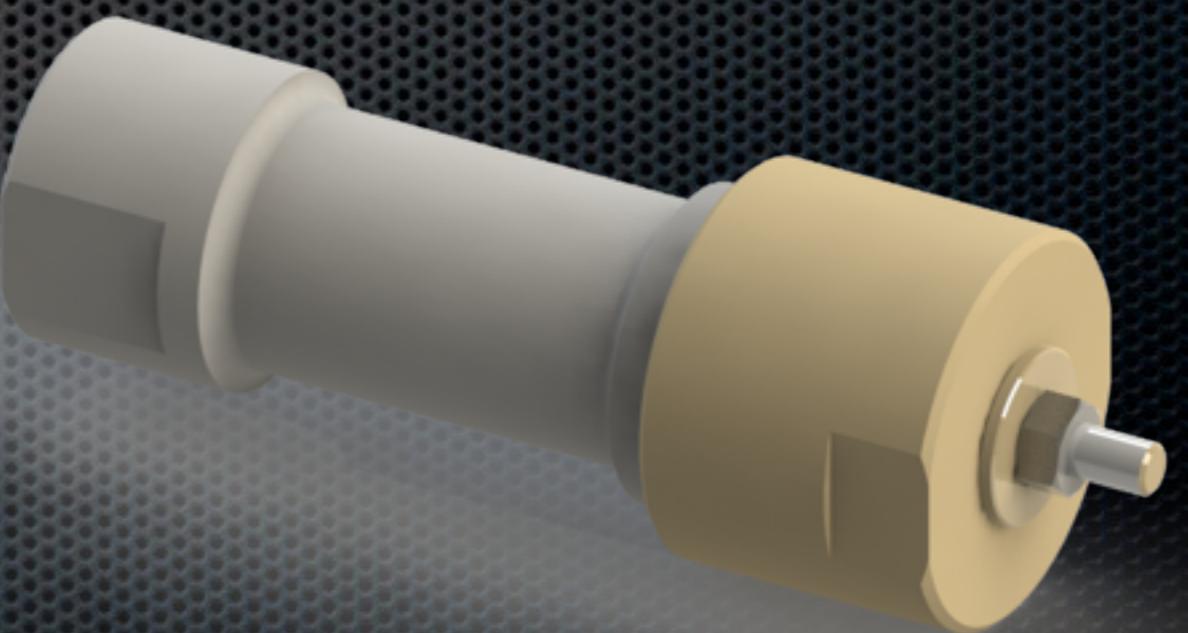

5 kbar asymmetric cells for NSE & SANS

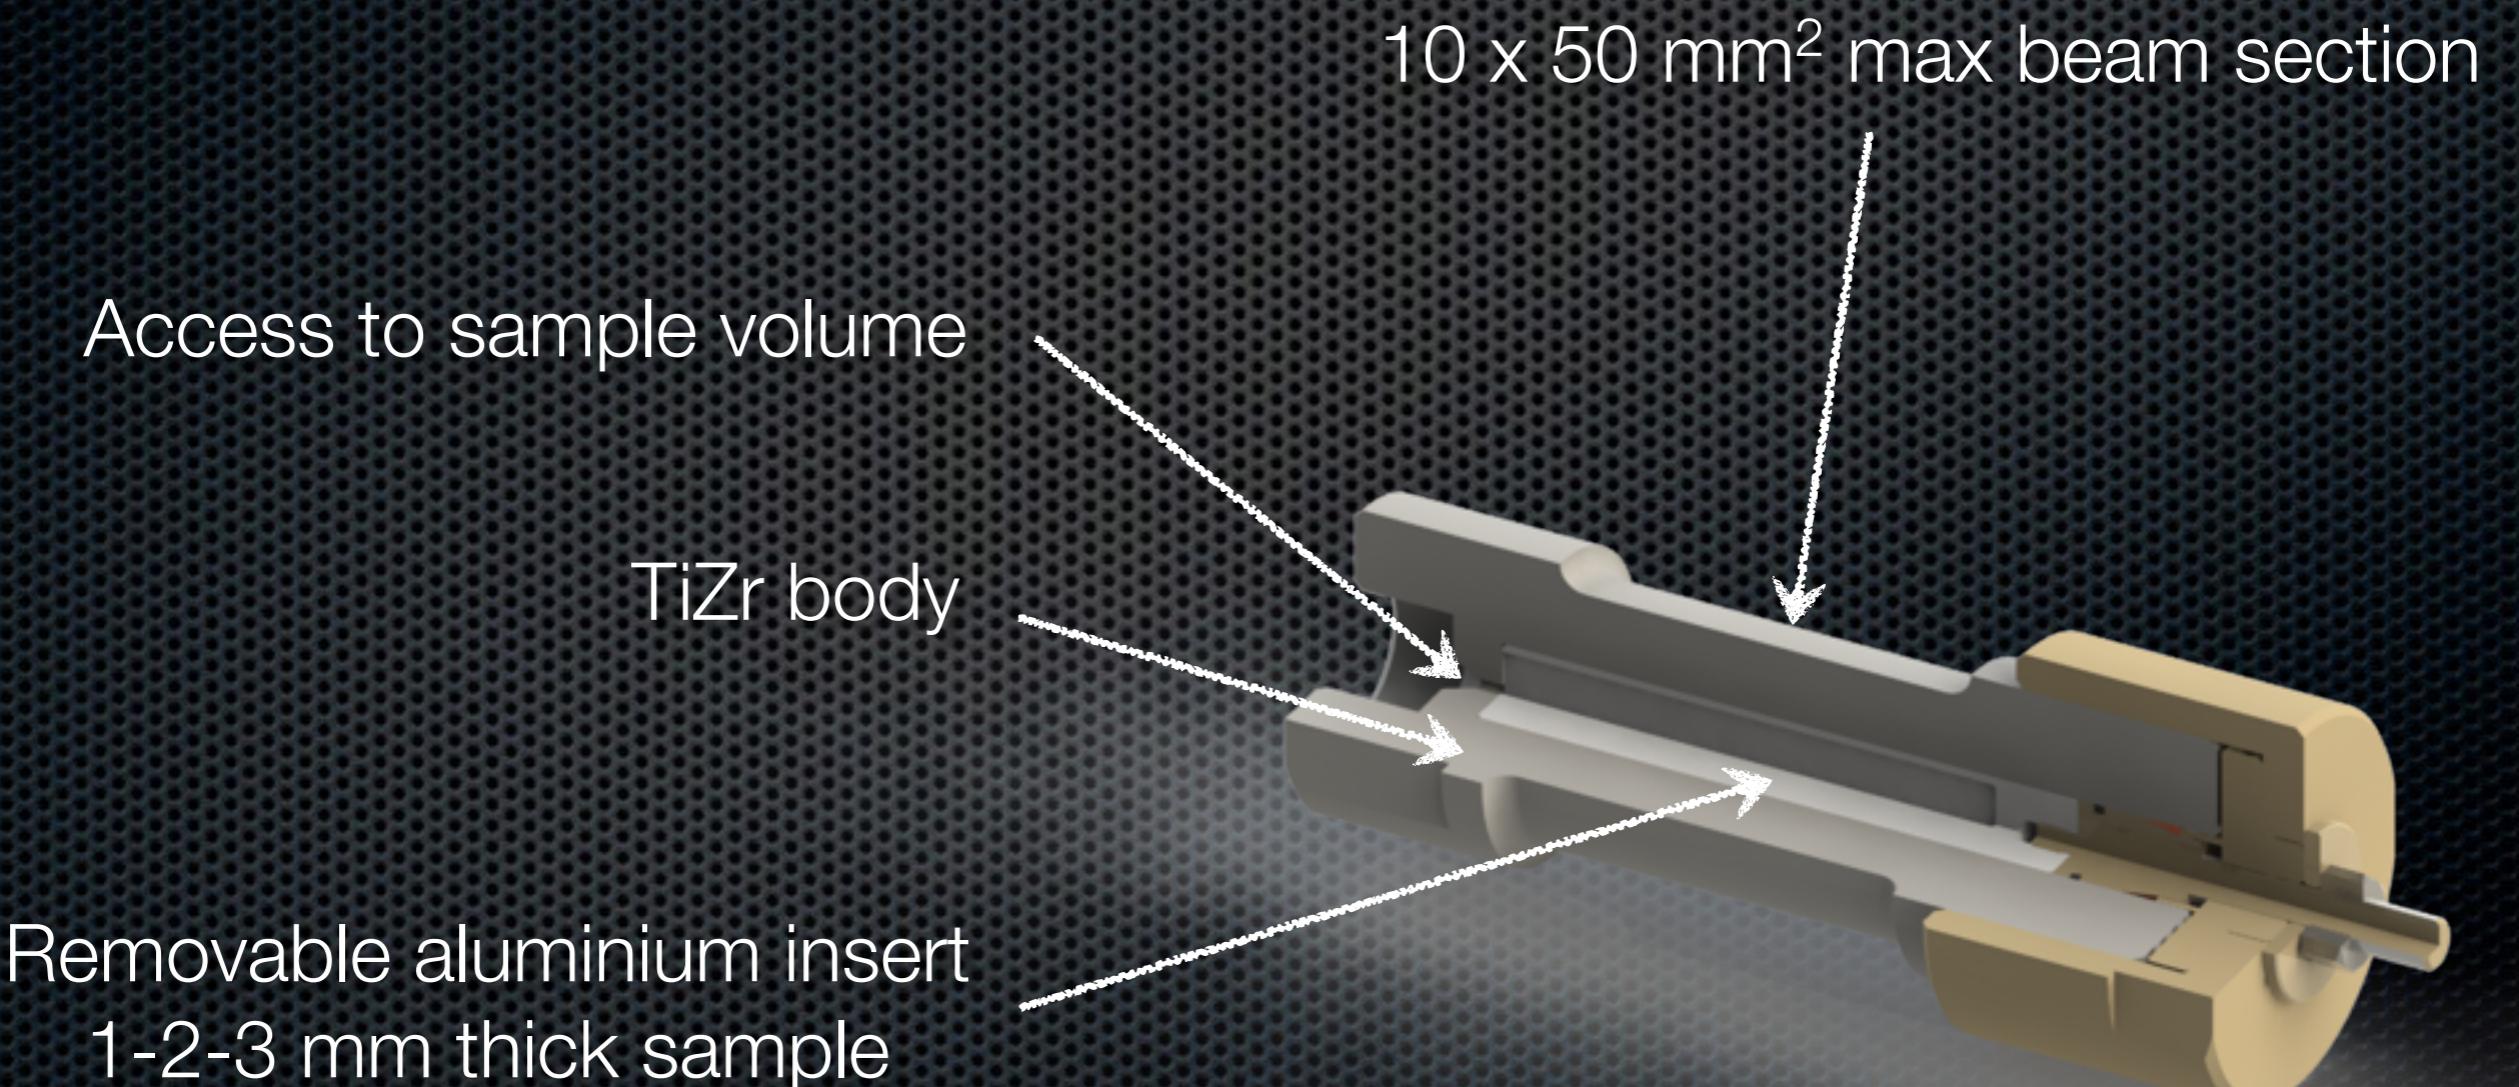

5+ kbar flat neutron windows cell

Needs

- Investigate biological samples on back-scattering spectrometer
- Pressure controlled up to 5-7 kbar
- Flat windows to simplify data analysis
- Easy to manipulate and clean

5+ kbar flat neutron windows cell

Special thanks to...
